DETAILED ACTION

Allowable Subject Matter

Claims 10-13, 27-29, and 43-46 are allowed.

The following is an examiner's statement of reasons for allowance:

1. As for claims 10, the prior art does not teach or fairly suggest an infrared image focusing device that processes an image to find at least one window to which focusing is to be done dependent upon characteristics within the window, as well as estimating the distance from the device to an object using the temperature and/or position of the optics.
2. As for claims 27, the prior art does not teach or fairly suggest an infrared image focusing method that processes an image to find at least one window to which focusing is to be done dependent upon characteristics within the window using the function:

$$FMF(z) = \frac{1}{N} \sum (K \otimes I_z - m)^2$$

where K is an operator, N is a factor of normalization, and m is a variable.

3. As for claims 43, the prior art does not teach or fairly suggest an infrared image focusing device that processes an image to find at least one window to which focusing is to be done dependent upon characteristics within the window, as well as estimating the distance from the device to an object using the temperature and/or position of the optics.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2622

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
